**Paul E. Kennedy : Fun with Stars Stencils (Dover Little Activity Books)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Fun with Stars Stencils (Dover Little Activity Books):

3 of 4 people found the following review helpful. six basic designs By Audrey Frances There are six star motif stencils here, cut into heavy laminated paper. All six are disconnected stencils, having separations between elements, an visually interesting look on a wall or furniture. All are approximately 3-and-a-half inches square, and three patterns are pictured on the book cover. They are a nice size for preschooler art projects, though these specific stencils seem like good candidates for quilting patterns. It's a good price for some basic stencils.

Six pre-cut patterns for creating your own star-studded universe: circle of stars, six-pointed star, five-pointed stars,

more. Fun-filled designs for youngsters; attractive patterns for adults interested in decorating T-shirts, cushion covers, walls, and other flat surfaces.
