Aaron Acevedo : Gamescapes: Desert Steppes before purchasing it in order to gage whether or not it would be worth my time, and all praised Gamescapes: Desert Steppes:

Map tiles of churches and ruins are all well and good for roleplaying those small encounters, but when hordes clash, it's time for untold carnage on open battlemat terrain, in 1" squares or hexes as it suits you. This desert steppe terrain is perfect for a whole host of battlegrounds, from a raid by Mongolian horsemen to startroopers attacking on Mars. Wherever a rich red rocky landscape is suitable, whether it's modern Afghanistan or a fantasy wasteland, this is one stunning backdrop for the fighting.
