Also, I was surprised that these books were smaller than the other two books I have by this author. Her other books are 8.5 by 11, but Inky Christmas and Inky Galaxy are 8.5 by about 8. The artwork though is beautiful and imaginative, which is the reason I get this author's books. :-) Inky Galaxy in particular is unlike any other book I have, so I thought it would be fun to try space scenes.1 of 1 people found the following review helpful. Outta this world!!!By HonestlySuzieOuter Space has finally hit the adult coloring world! Helen Elliston has created a fun, whimsical Galaxy just for unleashing our imaginations. I'm a girly girl and am used to coloring flowers and birds. This one definitely takes me out of my comfort zone and into outer space. I can't wait to get started in this one! Grab a comfy seat, a cup of coffee and color your world.2 of 2 people found the following review helpful. Just Pure Fun!By Lisa's Colorful JourneyThis book is just pure fun! I love the illustrations and the fact that they are printed on just one side of the paper so I can use any medium I like to color them.

46 single-sided illustrations to colour. From aliens, singing and moon swinging astronauts, galactic girls, exploding planets, shooting stars bring them to life and make them unique in your own style, and transport your busy mind into a calm and mesmerizing galaxy far far away. NOTE FROM ARTIST: playing around I discovered that PENS work on this SILK front cover. If you get tempted to colour it like I did, the cover just needs more drying time than usual paper, or it will smudge... being a silky finish - I went for a different cover finish this time as I just loved the feel of it on my fingers... I hope you enjoy the book!!!!xxx
