An Inspired Way For Kids to Explore Science By Del Pinto[[VIDEOID:b1cb645bf293af2540d402bc64bc6b29]] The Kitchen Science Lab is a wonderful resource for any parent who is looking for a way to introduce science and crafting to their children. The 52 projects in the book are broken down into Sections. The projects in each section are between 3 to 6. Here is a list of the sections: Unit 1- Carbonated Chemical Reactions Unit 2 Crystal Creations Unit 3 Physics in Motion Unit 4 Life Science Unit 5 Astonishing Liquids Unit 6 Polymers, Colloids Misbehaving Materials Unit 7 Acids Basis Unit 8 Marvelous Microbiology Unit 9 Shocking Science Unit 10 Bodacious Botany Unit 11 Sunny Science Unit 12 Rocket Science The projects are so much fun. For example, in the section called "Acids and Bases" which has a fun project called "Acid Oceanification Experiment" that teaches the children how to visualize acidification by carbon dioxide. It is an easy to follow experiment that teaches simple science in a fun participatory manner. Additionally, Each Section is color-coded and that informs the reader about Protocols, the Science behind the experiment, as well as step-by-step instructions on

how to do the experiment. I was also grateful that the author included Safety tips with each experiment. As a parent who homeschools, I think this book is a great way for kids to enjoy science through some fun and easy experiments.0 of 0 people found the following review helpful. GREAT EXPERIMENTS USING STUFF FOUND ALREADY IN THE KITCHENBy mary l chavisGREAT EXPERIMENTS USING STUFF FOUND ALREADY IN THE KITCHEN. MY 8 YEAR OLD GRANDSON AND HIS FRIENDS ENJOY THESE EXPERIMENTS0 of 0 people found the following review helpful. Five StarsBy Javi6410great book for my daughter

At-home science provides an environment for freedom, creativity and invention. In your own kitchen, it's simple, inexpensive, and fun to whip up a number of amazing science experiments using everyday ingredients. Science can be as easy as baking. Hands-On Family: Kitchen Science Lab for Kids offers 52 fun science activities for families to do together. The experiments can be used as individual projects, for parties, or as educational activities groups. Kitchen Science Lab for Kids will tempt families to cook up some physics, chemistry and biology in their own kitchens and back yards. It's the perfect resource for Girl Scout Brownies looking to earn their Home Scientist badges! Many of the experiments are safe enough for toddlers and exciting enough for older kids, so families can discover the joy of science together.

"Heinecke takes kids - and their parents - through the step-by-step process of scientific method, with easy-to-follow instructions and photos." - Omaha World-Herald
