**CaseMate Publishers : The ANZACs (Classic Warbirds)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The ANZACs (Classic Warbirds):

An updated and extended version of the now out-of-print CW volume on ANZAC Spitfire pilots, this new book in the highly acclaimed Classic Warbirds series tells the stories of ten Australian and New Zealand pilots in WW2, flying Spitfires and Hurricanes based in Britain, the Middle East and the CBI theater. Based on interviews with the pilots and their written memoirs, this is a fascinating look at the personalities inside the fighter planes. Profusely illustrated with photos (many from the pilots own collections) and Malcolm Lairds superb artwork, this is essential reading for students of WW2 air warfare, enthusiasts, and modelers. Malcolm Laird has been producing books, decal sheets and model kits for many years, and his Ventura products are highly regarded all over the world. Co-author Steve Mackenzie is an aviation historian.

gives us a nice look at the men who were in the planes. anyone who enjoys pilot histories and personal accounts will enjoy (IPMS) About the Author New Zealander Malcolm Laird has been producing books, decal sheets and model kits for many years, and his Ventura products are highly regarded all over the world. Co-author Steve Mackenzie is an aviation historian.
